1. Introduction

This catalog contains 4921 non-telescopic sunspots observations from 1988 to 2007. This compilation is based on naked-eye observations of sunspots observed by independent observers and employees of Observatory Kysucke Nove Mesto (Slovak Republic). Independent observers have sent their observations by mail to P. Begeň (one of authors), a few observers have sent them to Observatory Valasske Mezirici (Czech Republic). Observatory Kysucke Nove Mesto has archived their observations themselves.
